

SHINE & PROTECT WITH PROFIT BUILDERS

An advanced seal and protection by use of a deeply penetrating foam. This advanced chemistry has been formulated to create a surface-shield that is soft to the touch, hydrophobic, intensely reflective, and durable to withstand nature's elements. The infused surfactants can also be removed with a standard wash process to eliminate any build-up due to repeated applications with unlimited club members.

This super sealant formulated with Apeximer® Technology provides an apex level of protection as a result of combining polymers that create a cross-linking effect or web-like application of protection. ProShield® is a natural, pure surfactant that has no artificial fragrances or colors to ensure its flawless and synergistic properties.

Advanced Brightening Polymers bond to the vehicle, producing a smooth, high gloss surface with enhanced shine that will bring customers back to your top package again and again.
