

CERAMIC C-FORCE™

A waterborne molecular silicon infused product that surpasses what is expected!

Upon application, C-Force™ offers an advanced seal and protection by use of a deeply penetrating foam. This advanced chemistry has been formulated to create a surface-shield that is soft to the touch, hydrophobic, intensely reflective, and durable to withstand nature's elements. The infused surfactants can also be removed with a standard wash process to eliminate any build up due to repeated applications with unlimited club members.

Key Attributes

- Comprehensive foam application for deep penetrating coverage
- Creates "slick surface" feel
- Magnified shine
- Premier water beading & hydrophobic shield
- Provides "nano-scratch" resistance
- Refreshing fragrance option
UF461 orange-vanilla scent with UV protection
- Revenue enhancing product for the operators
- Available in unscented(UF460) and scented(UF461) formulas

Compatible with
Ultraflex
System
