

PURCLEAN™
Spot-Free Rinse & Water Recovery Systems

Efficient, Economical, Environmentally Friendly

E to the Power of Three - The E³ Series from PurClean™

For more than 30 years, PurClean has been the leading provider of water treatment solutions for the carwash operator.

The E3 Series of Spot-Free Rinse Systems improves upon the consistent offering of quality equipment from PurClean™. This series of units is more economical by harnessing new technology that increases efficiency while also reducing cost. These improvements allow for increased life of the equipment and optimized reliability.

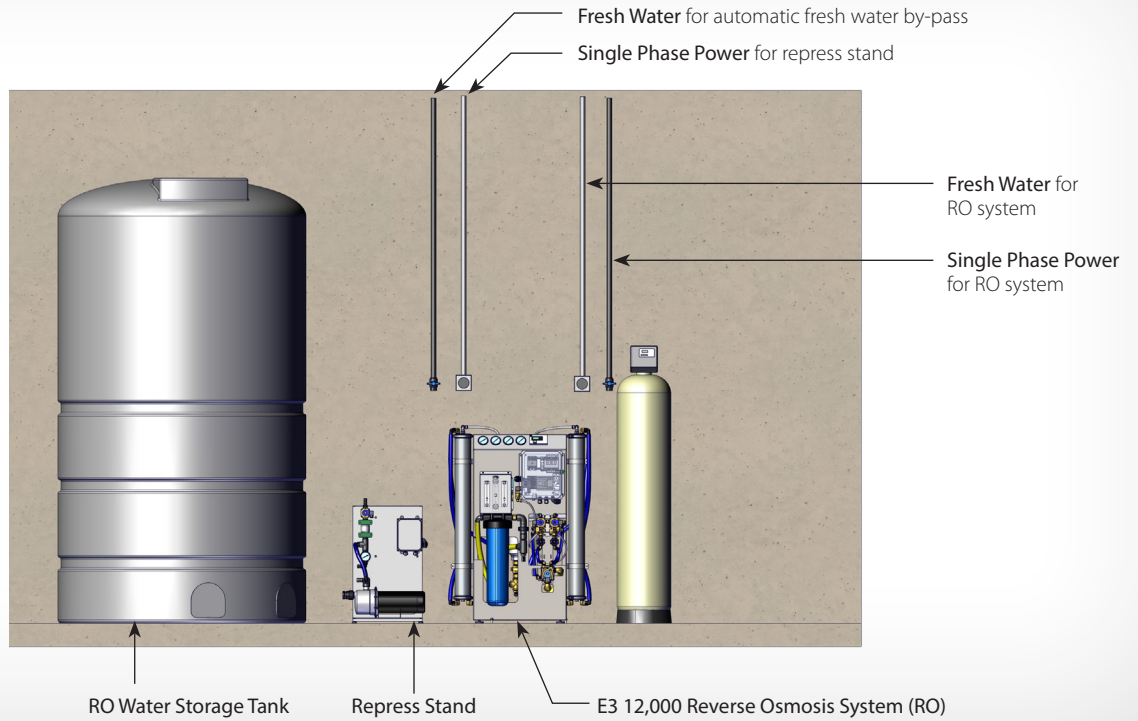

- Increased product to reject ratios - as high as 4:1
- Patent pending water stabilizer bar eliminates the need for a water softener
- Optimized membrane performance
- Viewable system status
- Multiple model sizes to meet the needs of all washes
- Uniquely engineered reject water recapture systems

Our dedicated engineering and technical support offers the best service to assist you every step. Unparalleled project management, professional installation, industry-leading warranty, and onsite training ensure continuous cost-effective performance of your system.
